FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

CC Docket No 94-102

Sean O'Hara
E911 Development Manager
American Cellular Corporation
3910 South Avenue
Youngstown, OH 44512

SUBJECT: Phase I and Phase II Enhanced Wireless 9-1-1 Service Request

Dear Sean,

Pursuant to Title 47 of the Code of Federal Regulations, Section 20.18(d) and Minnesota Statutes, Section 403.08, Subdivision 7, and on behalf of the Minnesota Public Safety Answering Points (PSAPs) in the affected areas, the State of Minnesota is hereby ordering Phase I Enhanced 9-1-1 Service.

Pursuant to Title 47 of the Code of Federal Regulations, Section 20.18(e) and Minnesota Statutes, Section 403.08, Subdivision 7, and on behalf of the Minnesota PSAPs in the affected areas, the State of Minnesota is hereby ordering Phase II Enhanced 9-1-1 Service. Phase II Enhanced 9-1-1 Service is requested as soon as practicable, but not later than October 1, 2001.

Each American Cellular Corporation cell site in Minnesota can have calls routed to a local or Minnesota State Patrol PSAP which is capable of receiving and utilizing the data elements associated with the service, and a mechanism for recovering the PSAPs' costs of the enhanced 9-1-1 service is in place.

The attached chart is forwarded as State of Minnesota input for Attachment 3 to the previously forwarded contract form. Each Minnesota State Patrol Public Safety Answering Point is connected to one or more Qwest Enhanced 9-1-1 selective routers, and can serve as primary or default PSAPs if necessary. Enhanced 9-1-1 Service in these areas is provided by either Independent Emergency Services (IES) or Qwest. Please advise if I have missed any Minnesota coverage areas.

Likely answering points have been selected on the basis of past correspondence with the PSAP managers concerned, and should be verified during the implementation process. "Local" indicates a preference for having calls answered at the local PSAP. "Varies" indicates either splitting call routing by the specific location of the cell tower or by whether the local PSAP is ready to receive Enhanced Wireless 9-1-1 calls or prefers to have them answered by the District State Patrol Communications Center.

Contacts at IES and Qwest for 9-1-1 implementation issues are Rick Morrow (320 234-5247) for IES and Jackie Mines (612 663-7715) for Qwest.

We look forward to implementation of Enhanced Wireless 9-1-1 service, which will be of mutual benefit to your subscribers and to the effectiveness of the public safety response systems. Please keep me informed if there is anything else the State should do to help you move this effort forward and ensure expeditious implementation.

Please call with questions at 651 296-7104.

Sincerely,

James R. Beutelspacher
Statewide 9-1-1 Program Manager
Customer Service and Product Management Division
